IP International Journal of Maxillofacial Imaging

Journal homepage: <https://www.ijmi.in/>

From Editor-in-Chief,

'Learning how to learn is life's most important skill'.

- **Tony Buzzan**

I would like to utilize this moment to express our gratitude to our loyal readers, exceptionally creative and gifted writers, knowledgeable reviewers, and respected editorial board for their contributions to the journal.

The International Journal of Maxillofacial Imaging was established as a quarterly journal with the main purpose of offering a venue for the publication of top-notch scientific articles about advancements in practice-oriented skills and research, as well as an awareness of the most recent developments in the field of oral and maxillofacial imaging.

Technology advancements are causing a paradigm shift in the dental industry's procedures, treatments provided, and business structures. This shift has been building for a few years and will become more pronounced in the future as dental professional inclinations keep changing.

Team IJMI would like to congratulate everyone whose papers have been published in this issue and sincerely thank their reviewers and supervisors.

In order to inspire readers and fulfil your social obligation by benefiting the community at large, I modestly plea each of you to share your research and patient management advances.

Dr. Sowmya Gujjar Vishnurao

Editor-in-Chief: International Journal of Maxillofacial Imaging.

Professor

Department of Oral Medicine & Radiology

Institute of Dental Sciences, Bareilly International University,

Bareilly, Uttar Pradesh, India
